Projects

Front-End Capstone Project – My Yoga App

<https://github.com/sanjeetprasad/My-Yoga-App>

My Yoga App is an App design for the working busy people, who do not have time to drive to a yoga studio or to follow an hour-long video to practice yoga whenever they want. This App will help them to design their own time base yoga sequences.

Nutshell

<https://github.com/nss-day-cohort-44/nutshell-sun-satyr>

This application is a dashboard for people to present and organize their daily tasks, events, news articles, friends and messages. I built it with 3 teammates at Nashville Software School.

Holiday Road

<https://github.com/nss-day-cohort-44/holiday-road-organ-pipe-cactus>

We built the Application for a hiker, geocaches Jake Wheeler. The goals of this App were to populate the National park data, with 7 days of weather and attraction, eateries. where Jake can see the data and plan his trip and saved his trip for the upcoming future.
